DETAILED ACTION

Allowable Subject Matter

1. Claims 17-28 are allowed.
2. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Response to Arguments

3. Applicant's arguments filed 09 February 2007 have been fully considered but they are not entirely persuasive.

Examination of remaining claims 1-16 and 29-71 would involve a significant burden not found in examination of claims 17-28, as the arrangements recited in claims 1-16 and 29-71 contain features not found in the elected claims, e.g. determining quality metrics from control signal that includes one or more codewords repeated at a desired power control rate (claims 1-8 and 29-46), a control signal with no power level limitations and determination of power control signals based on the strength of control signals received (claims 12-16), comparing a control signal strength with a power control set point, wherein the control signal can be transmitted with variable power (claims 9-11), a codeword with slot timing that corresponds with a desired power control rate (claims 47-63), and transmitting a codeword repeatedly a predetermined number of times and forming a codeword having a number of elements equal to the number of

Art Unit: 2112

repetitions (claims 64-71). None of these features is closely related to the present examination class, further increasing the burden of examination.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

Non-elected claims 1-16 and 29-71 should be cancelled.

5. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
